

Be prepared for the future with SeapiX and MLD: Introducing Active Catch Selection

In the future skippers will identify, select and actively target the most attractive fish from both an economical and environmental perspective.

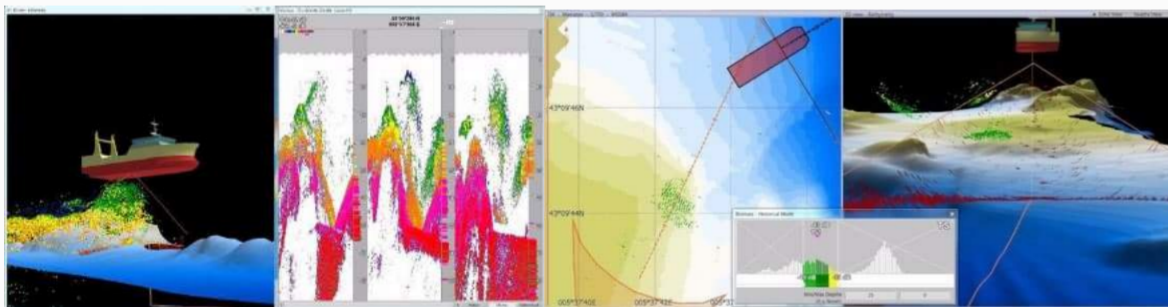

SeapiX and MLD have the technology to make this happen and by integrating these two technologies the next generation of equipment for fishing is a reality.

MLD and SeapiX invite you to a seminar in Skagen to know more about our technologies. The seminar will be organized in Skagen.

Join us the 6th of September 2018 from 15:00 to approx. 18:00 followed by a buffet dinner or on the 7th of September 2018 from 09:00 to approx. 12:00 followed by a buffet lunch.
